

WHAT IS AN ERGONOMIC EVALUATION?

Assesses an individual's workstation to ensure optimal working posture and work practices.

A supportive service an employer can offer to an employee to ensure optimal comfort.

Maintains productivity.

Fosters increased satisfaction with the workplace and helps maintain employee morale and health.

Taking Care of YOUR business.

Organizational Solutions Inc. sees Ergonomic Evaluations as an essential component of looking after your workforce and your workplace.

We recognize that the quality and effectiveness of our programs are why our clients trust in our success, and so each project is designed and managed to minimize human and financial loss.

We measure and provide you with data regarding all our results.

ERGONOMIC EVALUATIONS

"The RIGHT care, at the RIGHT time, for the RIGHT outcome ©."

Ergonomics designs the workplace environment to fit the user. The many benefits of an evaluation for your employees is the prevention of health issues such as repetitive strain injuries, which can develop over time and can lead to long-term disability.

Ergonomics (or human factors) is defined by the International Ergonomics Association as: “the scientific discipline concerned with the understanding of interactions among humans and other elements of a system, and the profession that applies theory, principles, data and methods to design in order to optimize human well-being and overall system performance.”

For employers an Ergonomic Evaluation by Organizational Solutions Inc. can fulfil the two goals of health and productivity in your workforce. This can be an essential component of the preventative measures we offer in our Disability Management programs.

Among the many benefits of an Ergonomic Evaluation are:

- Ensuring the safety of employees, both long and short-term.
- Reducing costs by improving safety.
- Decreasing the overall claim costs of workers' compensation.
- Identifies areas that could be improved and fixes the issues before they become a larger problem

The Service

We conduct a detailed observation and assessment of a particular employee and their workstation, equipment and work practices commonly used. This allows us to develop recommendations regarding potential modifications to the workstation as well as optimal work postures, methods and practices allowing an employee to safely perform their employment position.

Service Overview

- Highly qualified, specifically trained experts.
- Individualized analysis of the workstation and job functions.
- Recommendations specific to employee and employer needs.

Our Difference

- Highly qualified, specifically trained experts.
- Objective assessment of specific job requirements.
- Interview and observation with employees.
- Quantitative measurement of required job tasks.
- Identification of essential tasks of position.
